JUAN BUFILL
Barcelona

The programming [...]. **'In the forest'**. The collective exhibition *In the forest* brings together six photographic approaches to the theme of the forest. El Quadern Robot gallery has selected works by six photographers born between 1969 and 1975 and their proposals are very different. Israel Ariño enters the dark forest in his series *Obirar*. Oriol Jolonch represents post-apocalyptic fictions that refer to a destructive present. Laia Morero presents diptychs that reflect on the image and the point of view. Jordi Casañas looks at a detail and alludes to the myth of Icarus. Fiona Morrison adds unreality to the

landscape through superpositions. And the discovery is the excellent naturalist landscapes of Bernat Gasull, son and grandson of well-known photographers. *El Quadern Robot. Còrsega, 267. Until September 29 (August closed).*
