ART AND TECHNOLOGY

1. The Canon camera that is with me for almost 10 years. 2. The blue color so present in my work, in photography and video as a filter, in painting with pigment and in installations with objects. 3. Hard drive to save pictures and videos, and if it carries a message from my daughter, better. 4. The tools to make ceramics because at the moment it is one of the activities that relaxes me the most. 5. My grandfather's pruning shears have always been with me and help me keep the garden beautiful. 6. The iPhone and laptop are my office, wherever I am, and the iPhone is even my second professional photo and video camera. 7. I love to read before going to bed and these are the books I have on my bedside table now. 8. I have adopted my father's pencils, they are very good and when I use them I think of him. 9. I have a lot of different brushes because depending on what you want to do you need one or another, I love Chinese soft ones. 10. I need glasses to read, I don't know what I would do without them.
